AUTHOR INDEX

Thermochimica Acta, 219 (1993) 383–389
Elsevier Science Publishers B.V., Amsterdam

SUBJECT INDEX

Accuracy
On the accuracy of results from microcalorimetric measurements on cellular systems 1
On the estimation of gas-phase thermodynamic properties of organic compounds 361
Additivity
On the estimation of gas-phase thermodynamic properties of organic compounds 361
Aero engine
Deposit formation in aero engines — investigation by pressure differential scanning calorimetry (PDSC) 305
Alloy
Thermodynamic investigation of the Rh–Ge and Ir–Ge binary alloys 365
Atmosphere
Thermal decomposition of the hydrated basic carbonates of lanthanides and yttrium in CO_2 atmosphere 225
Studies on the formation of γ-Fe_2O_3 by thermal decomposition of ferrous malate dihydrate 269

Basic carbonate
Thermal decomposition of the hydrated basic carbonates of lanthanides and yttrium in CO_2 atmosphere 225
Binary system
Correlation of heats of mixing of liquid mixtures by the NRTL model 83
Bioenergetics
Developments in cellular microcalorimetry with particular emphasis on the valuable role of the energy (enthalpy) balance method 17
Biological calorimetry
Developments in cellular microcalorimetry with particular emphasis on the valuable role of the energy (enthalpy) balance method 17
Biuret
A study of the thermal decomposition of urea, of related compounds and thiourea using DSC and TG–EGA 315

Blend
Thermogravimetric studies on miscible blends of ethylene–methyl acrylate copolymer (EMA) and polydimethylsiloxane rubber (PDMS) 283
Brönsted acid
The effect of pre-heating on the evolution of the acidity of pillared clays 179

Cadmium compound
A calorimetric study of the protonation of vitamin D_3 and of three other ligands and their formation of binary and ternary complexes with Cd(II) 115
Calibration
The temperature calibration of scanning calorimeters. Part 2. Calibration substances 333
Calorimetry
On the accuracy of results from microcalorimetric measurements on cellular systems 1
The enthalpy of solution of sodium, potassium and caesium chlorides in propionic acid–water mixtures at 298.15 K 105
The temperature calibration of scanning calorimeters. Part 2. Calibration substances 333
Carbonate
The properties of salt-filled sodalites. Part 3. Synthesis and thermal behaviour of basic and non-basic carbonate enclathrated sodalites 205
Thermal decomposition of the hydrated basic carbonates of lanthanides and yttrium in CO_2 atmosphere 225
Cellulose
Thermal behaviour of some homogeneously esterified products of high α-cellulose pulps of fast growing plant species 191
Clathrate
The properties of salt-filled sodalites. Part 3. Synthesis and thermal behaviour of basic and non-basic carbonate enclathrated sodalites 205
Clay
The effect of pre-heating on the evolution of the acidity of pillared clays 179

Cobalt compound
Structural and thermal studies of the chloro complexes of cobalt, nickel and copper with 1,6-hexanediamine 159
Conductivity
Thermal conductivity measurements of tRNA melting process 355
Copolymer
Thermogravimetric studies on miscible blends of ethylene–methyl acrylate copolymer (EMA) and polydimethylsiloxane rubber (PDMS) 283
Copper compound
Structural and thermal studies of the chloro complexes of cobalt, nickel and copper with 1,6-hexanediamine 159
Co-solvent
The enthalpy of solution of sodium, potassium and caesium chlorides in propionic acid–water mixtures at 298.15 K 105
Cross link
The effect of crosslink density, curing system, filler and resin on the decomposition of hydrogenated nitrile rubber and its blends 293
Curing
The effect of crosslink density, curing system, filler and resin on the decomposition of hydrogenated nitrile rubber and its blends 293
Cyanuric acid
A study of the thermal decomposition of urea, of related compounds and thiourea using DSC and TG–EGA 315

Decomposition
Preparation and thermal decomposition of solid state compounds of 4-methoxybenzylidenepyruvate and trivalent lanthanides and yttrium 215
Thermally induced isomerization and decomposition of *N*-(2-aminoethyl)-1,3-propanediamine complexes of nickel(II) in the solid state 261
Studies on the formation of γ-Fe_2O_3 by thermal decomposition of ferrous malate dihydrate 269
The effect of crosslink density, curing system, filler and resin on the decomposition of hydrogenated nitrile rubber and its blends 293
Dehydration
Studies on the formation of γ-Fe_2O_3 by thermal decomposition of ferrous malate dihydrate 269
Denaturation
The thermal denaturation of histones (H_2A, H_3, H_2B) in the presence of surfacants 151
Deposit
Deposit formation in aero engines — investigation by pressure differential scanning calorimetry (PDSC) 305
Detergent
Thermodynamic studies of the interaction of glucose oxidase with anionic and cationic surfactants 143
DMSO
Thermodynamic parameters of transfer and solution of oxalic acid in dimethylsulphoxide–water media 65
DPPA
A thermal study of lanthanoid trifluoromethanesulfonate complexes with diphenylphosphinamide (DPPA) 173
DSC
The perfection of a method for the determination of the temperature/vapour-pressure function of liquids by differential scanning calorimetry 167
Preparation and thermal decomposition of solid state compounds of 4-methoxybenzylidenepyruvate and trivalent lanthanides and yttrium 215
Polymorphism of phenethylammonium bromide: the effect of particle properties on the thermodynamics 245
Thermally induced isomerization and decomposition of *N*-(2-aminoethyl)-1,3-propanediamine complexes of nickel(II) in the solid state 261
Deposit formation in aero engines — investigation by pressure differential scanning calorimetry (PDSC) 305
A study of the thermal decomposition of urea, of related compounds and thiourea using DSC and TG–EGA 315
A theoretical investigation of the preconditions for obtaining the true thermodynamic transition temperature from only one DSC measurement 325
Thermal conductivity measurements of tRNA melting process 355
DTA
Structural and thermal studies of the chloro complexes of cobalt, nickel and copper with 1,6-hexanediamine 159
Thermal behaviour of some homogeneously esterified products of high α-cellulose pulps of fast growing plant species 191
Thermal decomposition of the hydrated basic carbonates of lanthanides and yttrium in CO_2 atmosphere 225
Topochemical transformations of hydrated sodium triphosphate, lithium triphosphate and mixed triphosphates 235
Thermally induced isomerization and de-

composition of *N*-(2-aminoethyl)-1,3-propanediamine complexes of nickel(II) in the solid state 261
Studies on the formation of γ-Fe_2O_3 by thermal decomposition of ferrous malate dihydrate 269
Thermogravimetric studies on miscible blends of ethylene–methyl acrylate copolymer (EMA) and polydimethylsiloxane rubber (PDMS) 283
DTAB
Thermodynamic studies of the interaction of glucose oxidase with anionic and cationic surfactants 143
The thermal denaturation of histones (H_2A, H_3, H_2B) in the presence of surfacants 151
DTG
The effect of pre-heating on the evolution of the acidity of pillared clays 179
Thermal behaviour of some homogeneously esterified products of high α-cellulose pulps of fast growing plant species 191
Thermal decomposition of the hydrated basic carbonates of lanthanides and yttrium in CO_2 atmosphere 225
Topochemical transformations of hydrated sodium triphosphate, lithium triphosphate and mixed triphosphates 235
Studies on the formation of γ-Fe_2O_3 by thermal decomposition of ferrous malate dihydrate 269
Thermogravimetric studies on miscible blends of ethylene–methyl acrylate copolymer (EMA) and polydimethylsiloxane rubber (PDMS) 283
The effect of crosslink density, curing system, filler and resin on the decomposition of hydrogenated nitrile rubber and its blends 293

EDTA
Thermal conductivity measurements of tRNA melting process 355
EGA
A study of the thermal decomposition of urea, of related compounds and thiourea using DSC and TG–EGA 315
EMA
Thermogravimetric studies on miscible blends of ethylene–methyl acrylate copolymer (EMA) and polydimethylsiloxane rubber (PDMS) 283
Energy balance
Developments in cellular microcalorimetry with particular emphasis on the valuable role of the energy (enthalpy) balance method 17
Equipment
The perfection of a method for the determination of the temperature/vapour-pressure function of liquids by differential scanning calorimetry 167
Escherichia
Thermal conductivity measurements of tRNA melting process 355

Fermentation
A microcalorimetric study of the inhibitory effects of ethanol on the fermentation process of D-xylose by *Pichia stipitis* 135
Flow injection analysis
On the use of mixing reactors in flow injection analysis with thermal lens calorimetric detection 53
FTIR
A study of the thermal decomposition of urea, of related compounds and thiourea using DSC and TG–EGA 315

Gamma irradiation
Structural interpretation of the ambiguous loopy effect of gamma irradiation on the phase transition thermodynamics of US-HY zeolite 73
GEFTA
The temperature calibration of scanning calorimeters. Part 2. Calibration substances 333
Glucose oxidase
Thermodynamic studies of the interaction of glucose oxidase with anionic and cationic surfactants 143

Heat capacity
Structural interpretation of the ambiguous loopy effect of gamma irradiation on the phase transition thermodynamics of US-HY zeolite 73
Heat of decomposition
A study of the thermal decomposition of urea, of related compounds and thiourea using DSC and TG–EGA 315
Heat of formation
Thermodynamic investigation of the Rh–Ge and Ir–Ge binary alloys 365
Heat of fusion
Thermodynamic properties of organic compounds. Part 4. First update of enthalpy of fusion and melting point temperature compilation 97
A study of the thermal decomposition of urea, of related compounds and thiourea using DSC and TG–EGA 315

Heat of mixing
Correlation of heats of mixing of liquid mixtures by the NRTL model 83
Heat of solution
The enthalpy of solution of sodium, potassium and caesium chlorides in propionic acid–water mixtures at 298.15 K 105
Hexanediamine
Structural and thermal studies of the chloro complexes of cobalt, nickel and copper with 1,6-hexanediamine 159
Histone
The thermal denaturation of histones (H_2A, H_3, H_2B) in the presence of surfacants 151
HNBR
The effect of crosslink density, curing system, filler and resin on the decomposition of hydrogenated nitrile rubber and its blends 293
Hot-stage microscopy
Polymorphism of phenethylammonium bromide: the effect of particle properties on the thermodynamics 245

Iron compound
Studies on the formation of γ-Fe_2O_3 by thermal decomposition of ferrous malate dihydrate 269
Iron malate
Studies on the formation of γ-Fe_2O_3 by thermal decomposition of ferrous malate dihydrate 269
IRS
A thermal study of lanthanoid trifluoromethanesulfonate complexes with diphenylphosphinamide (DPPA) 173
Topochemical transformations of hydrated sodium triphosphate, lithium triphosphate and mixed triphosphates 235
Isomer
Thermally induced isomerization and decomposition of *N*-(2-aminoethyl)-1,3-propanediamine complexes of nickel(II) in the solid state 261
Isoperibol
The enthalpy of solution of sodium, potassium and caesium chlorides in propionic acid–water mixtures at 298.15 K 105

Kinetics
Studies on the thermokinetics of reversible reactions 43

Lanthanon compound
A thermal study of lanthanoid trifluoromethanesulfonate complexes with diphenylphosphinamide (DPPA) 173
Preparation and thermal decomposition of solid state compounds of 4-methoxybenzylidenepyruvate and trivalent lanthanides and yttrium 215
Thermal decomposition of the hydrated basic carbonates of lanthanides and yttrium in CO_2 atmosphere 225
Lewis acid
The effect of pre-heating on the evolution of the acidity of pillared clays 179
Ligand
Thermodynamics of complexation of some transition metal ions by salicylaldehyde carbohydrazone pyridinium chloride and diacetyl carbohydrazone pyridinium chloride 121
Living system
On the accuracy of results from microcalorimetric measurements on cellular systems 1
Lubricant
Deposit formation in aero engines — investigation by pressure differential scanning calorimetry (PDSC) 305

Melting
Thermal conductivity measurements of tRNA melting process 355
Melting point
Thermodynamic properties of organic compounds. Part 4. First update of enthalpy of fusion and melting point temperature compilation 97
Methodology
The perfection of a method for the determination of the temperature/vapour-pressure function of liquids by differential scanning calorimetry 167
Methoxybenzylidenepyruvate
Preparation and thermal decomposition of solid state compounds of 4-methoxybenzylidenepyruvate and trivalent lanthanides and yttrium 215
Microcalorimetry
On the accuracy of results from microcalorimetric measurements on cellular systems 1
A microcalorimetric study of the inhibitory effects of ethanol on the fermentation process of D-xylose by *Pichia stipitis* 135
Mixed salt
Topochemical transformations of hydrated sodium triphosphate, lithium triphosphate and mixed triphosphates 235
Model
Studies on the thermokinetics of reversible reactions 43
Correlation of heats of mixing of liquid mixtures by the NRTL model 83

Montmorillonite
The effect of pre-heating on the evolution of the acidity of pillared clays 179

Nickel compound
Structural and thermal studies of the chloro complexes of cobalt, nickel and copper with 1,6-hexanediamine 159
Thermally induced isomerization and decomposition of *N*-(2-aminoethyl)-1,3-propanediamine complexes of nickel(II) in the solid state 261
NRTL
Correlation of heats of mixing of liquid mixtures by the NRTL model 83

Oil
Deposit formation in aero engines — investigation by pressure differential scanning calorimetry (PDSC) 305
Oxalic acid
Thermodynamic parameters of transfer and solution of oxalic acid in dimethylsulphoxide–water media 65
Oxidation
The effect of crosslink density, curing system, filler and resin on the decomposition of hydrogenated nitrile rubber and its blends 293
Deposit formation in aero engines — investigation by pressure differential scanning calorimetry (PDSC) 305

PDMS
Thermogravimetric studies on miscible blends of ethylene–methyl acrylate copolymer (EMA) and polydimethylsiloxane rubber (PDMS) 283
PDSC
Deposit formation in aero engines — investigation by pressure differential scanning calorimetry (PDSC) 305
Phase
The properties of salt-filled sodalites. Part 3. Synthesis and thermal behaviour of basic and non-basic carbonate enclathrated sodalites 205
Thermodynamic investigation of the Rh–Ge and Ir–Ge binary alloys 365
Phase transition
Structural interpretation of the ambiguous loopy effect of gamma irradiation on the phase transition thermodynamics of US-HY zeolite 73
Polymorphism of phenethylammonium bromide: the effect of particle properties on the thermodynamics 245

Pichia
A microcalorimetric study of the inhibitory effects of ethanol on the fermentation process of D-xylose by *Pichia stipitis* 135
Polymorphism
Polymorphism of phenethylammonium bromide: the effect of particle properties on the thermodynamics 245
Pre-heating
The effect of pre-heating on the evolution of the acidity of pillared clays 179
Pre-history
The effect of pre-heating on the evolution of the acidity of pillared clays 179
Protein
The thermal denaturation of histones (H_2A, H_3, H_2B) in the presence of surfacants 151
Protonation
A calorimetric study of the protonation of vitamin D_3 and of three other ligands and their formation of binary and ternary complexes with Cd(II) 115
Pyridine
The effect of pre-heating on the evolution of the acidity of pillared clays 179

Recommendation
The temperature calibration of scanning calorimeters. Part 2. Calibration substances 333
Resin
The effect of crosslink density, curing system, filler and resin on the decomposition of hydrogenated nitrile rubber and its blends 293
Rubber
Thermogravimetric studies on miscible blends of ethylene–methyl acrylate copolymer (EMA) and polydimethylsiloxane rubber (PDMS) 283

SDS
Thermodynamic studies of the interaction of glucose oxidase with anionic and cationic surfactants 143
Sensitivity
A microcalorimetric study of the inhibitory effects of ethanol on the fermentation process of D-xylose by *Pichia stipitis* 135
SHS
Thermodynamic studies of the interaction of glucose oxidase with anionic and cationic surfactants 143
Sodalite
The properties of salt-filled sodalites. Part 3. Synthesis and thermal behaviour of basic

and non-basic carbonate enclathrated sodalites 205
Solubility
Thermodynamic parameters of transfer and solution of oxalic acid in dimethylsulphoxide–water media 65
Spectrophotometry
Thermodynamic studies of the interaction of glucose oxidase with anionic and cationic surfactants 143
Stability
The effect of pre-heating on the evolution of the acidity of pillared clays 179
Thermal decomposition of the hydrated basic carbonates of lanthanides and yttrium in CO_2 atmosphere 225
Stability constant
Thermodynamics of complexation of some transition metal ions by salicylaldehyde carbohydrazone pyridinium chloride and diacetyl carbohydrazone pyridinium chloride 121
Surface conduction coefficient
Towards a theory of the surface conductance coefficient in solids. Part 1 343
Surfactant
Thermodynamic studies of the interaction of glucose oxidase with anionic and cationic surfactants 143
The thermal denaturation of histones (H_2A, H_3, H_2B) in the presence of surfacants 151

TA
Structural interpretation of the ambiguous loopy effect of gamma irradiation on the phase transition thermodynamics of US-HY zeolite 73
TG
Structural and thermal studies of the chloro complexes of cobalt, nickel and copper with 1,6-hexanediamine 159
A thermal study of lanthanoid trifluoromethanesulfonate complexes with diphenylphosphinamide (DPPA) 173
The effect of pre-heating on the evolution of the acidity of pillared clays 179
Thermal behaviour of some homogeneously esterified products of high α-cellulose pulps of fast growing plant species 191
Preparation and thermal decomposition of solid state compounds of 4-methoxybenzylidenepyruvate and trivalent lanthanides and yttrium 215
Thermal decomposition of the hydrated basic carbonates of lanthanides and yttrium in CO_2 atmosphere 225
Topochemical transformations of hydrated sodium triphosphate, lithium triphosphate and mixed triphosphates 235
Thermally induced isomerization and decomposition of *N*-(2-aminoethyl)-1,3-propanediamine complexes of nickel(II) in the solid state 261
The effect of crosslink density, curing system, filler and resin on the decomposition of hydrogenated nitrile rubber and its blends 293
Deposit formation in aero engines — investigation by pressure differential scanning calorimetry (PDSC) 305
A study of the thermal decomposition of urea, of related compounds and thiourea using DSC and TG–EGA 315
TGA
Studies on the formation of γ-Fe_2O_3 by thermal decomposition of ferrous malate dihydrate 269
Thermogravimetric studies on miscible blends of ethylene–methyl acrylate copolymer (EMA) and polydimethylsiloxane rubber (PDMS) 283
The effect of crosslink density, curing system, filler and resin on the decomposition of hydrogenated nitrile rubber and its blends 293
A study of the thermal decomposition of urea, of related compounds and thiourea using DSC and TG–EGA 315
TG–DTG
Preparation and thermal decomposition of solid state compounds of 4-methoxybenzylidenepyruvate and trivalent lanthanides and yttrium 215
Thermal decomposition of the hydrated basic carbonates of lanthanides and yttrium in CO_2 atmosphere 225
Theory
Towards a theory of the surface conductance coefficient in solids. Part 1 343
Thermal lens calorimetry
On the use of mixing reactors in flow injection analysis with thermal lens calorimetric detection 53
Thermodynamics
Thermodynamic parameters of transfer and solution of oxalic acid in dimethylsulphoxide–water media 65
Structural interpretation of the ambiguous loopy effect of gamma irradiation on the phase transition thermodynamics of US-HY zeolite 73
A calorimetric study of the protonation of vitamin D_3 and of three other ligands and their formation of binary and ternary complexes with Cd(II) 115

Thermodynamics of complexation of some transition metal ions by salicylaldehyde carbohydrazone pyridinium chloride and diacetyl carbohydrazone pyridinium chloride 121
Thermodynamic studies of the interaction of glucose oxidase with anionic and cationic surfactants 143
Polymorphism of phenethylammonium bromide: the effect of particle properties on the thermodynamics 245
On the estimation of gas-phase thermodynamic properties of organic compounds 361
Thermodynamic investigation of the Rh–Ge and Ir–Ge binary alloys 365

Thermogenesis
Developments in cellular microcalorimetry with particular emphasis on the valuable role of the energy (enthalpy) balance method 17

Thiourea
A study of the thermal decomposition of urea, of related compounds and thiourea using DSC and TG–EGA 315

TLC
Topochemical transformations of hydrated sodium triphosphate, lithium triphosphate and mixed triphosphates 235

Transfer ribonucleic acid
Thermal conductivity measurements of tRNA melting process 355

Transition
Polymorphism of phenethylammonium bromide: the effect of particle properties on the thermodynamics 245

Transition metal compound
Thermodynamics of complexation of some transition metal ions by salicylaldehyde carbohydrazone pyridinium chloride and diacetyl carbohydrazone pyridinium chloride 121

Transition temperature
A theoretical investigation of the preconditions for obtaining the true thermodynamic transition temperature from only one DSC measurement 325

Triphosphate
Topochemical transformations of hydrated sodium triphosphate, lithium triphosphate and mixed triphosphates 235

tRNA
Thermal conductivity measurements of tRNA melting process 355

Urea
A study of the thermal decomposition of urea, of related compounds and thiourea using DSC and TG–EGA 315

Vapour pressure
The perfection of a method for the determination of the temperature/vapour-pressure function of liquids by differential scanning calorimetry 167

Vitamin D
A calorimetric study of the protonation of vitamin D_3 and of three other ligands and their formation of binary and ternary complexes with Cd(II) 115

XRD
The properties of salt-filled sodalites. Part 3. Synthesis and thermal behaviour of basic and non-basic carbonate enclathrated sodalites 205
Preparation and thermal decomposition of solid state compounds of 4-methoxybenzylidenepyruvate and trivalent lanthanides and yttrium 215
Topochemical transformations of hydrated sodium triphosphate, lithium triphosphate and mixed triphosphates 235
Studies on the formation of γ-Fe_2O_3 by thermal decomposition of ferrous malate dihydrate 269

Xylose
A microcalorimetric study of the inhibitory effects of ethanol on the fermentation process of D-xylose by *Pichia stipitis* 135

Yeast
A microcalorimetric study of the inhibitory effects of ethanol on the fermentation process of D-xylose by *Pichia stipitis* 135

Yttrium compound
Preparation and thermal decomposition of solid state compounds of 4-methoxybenzylidenepyruvate and trivalent lanthanides and yttrium 215
Thermal decomposition of the hydrated basic carbonates of lanthanides and yttrium in CO_2 atmosphere 225

Zeolite
Structural interpretation of the ambiguous loopy effect of gamma irradiation on the phase transition thermodynamics of US-HY zeolite 73
